CAREER OBJECTIVE

I'm a proactive and detail-oriented Computer Science undergraduate with a keen interest in backend development and Java-based applications. Skilled in building secure, logic-driven systems with efficient data handling and clean server-side architecture. Eager to contribute to impactful projects in a growth-focused, collaborative environment.

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya <i>Bachelor of Technology in Computer Science & Engineering; CGPA: 7.40/10</i>	Indore, M.P. 2022 – 2026
Takshshila Higher Secondary School <i>Higher Secondary Certificate (Class XII): 77.4% — Secondary School (Class X): 88.7%</i>	Indore, M.P. 2020 – 2022

TECHNICAL SKILLS

Programming Languages: Java (java 8)
Frameworks: Spring, Spring Boot, Spring MVC, JUnit
Technologies: Servlets, JSP, JDBC, REST APIs
Database: MySQL
Tools: Git, GitHub, IntelliJ IDEA, VS Code, Eclipse, Maven
DevOps: Docker, AWS(EC2)
Core Competencies: DSA, OOP, Backend Development, SDLC, Web Application

PROJECTS

Secure Personal Vault | *React, Spring Boot, Spring Security, JWT, MySQL* | <http://13.50.22.80/>

- Built a full-stack Secure Personal Vault using React, Spring Boot, Spring Security, JWT, and MySQL to store personal files and notes with strict per-user data isolation.
- Implemented JWT authentication with BCrypt password hashing, token expiry, and request-level authorization using Spring Security.
- Developed RESTful APIs with a clean layered architecture (Controller, Service, Repository) ensuring users can access only their own data.
- Designed a normalized MySQL schema with JPA/Hibernate for users, files, notes, and folders, and deployed the app on AWS EC2 using Docker Compose for containerized deployment.

Educational Institute System | *Java Servlets, JSP, MySQL, HTML/CSS, JavaScript*

- Architected and developed a full-stack web application to manage records and academic data using Model-View-Controller (MVC) design pattern, improving administrative efficiency
- Backend services with Java Servlets implementing CRUD operations, input validation, and error handling and MySQL database integration
- Designed responsive, dynamic user interfaces using JSP with role-based access control (RBAC) for students, faculty enhancing security through session management and authentication
- Collaborated with 2 team members, following development practices with code reviews and sprint-based delivery

CERTIFICATIONS

Programming in Java | *Softwaves Technologies*

- Learned core Java concepts, OOP, exception handling, collections, and multithreading.

Database Management Systems | *IIT Kharagpur*

- Learned database design, SQL optimization, transaction management, and normalization techniques.
